Document 1: JP 63-302950 A (Nissan Motor Co., Ltd.) December 9, 1988  
Document 2: JP 60-25544 A (Toyota Motor Corp.) February 8, 1985  
Document 3: JP 62-241552 A (Cataler Kogyo Kabushiki Kaisha) October 22, 1987  
Document 4: JP 11-262663 A (Toyota Motor Corp.) September 28, 1999

Based on the descriptions in documents 1-4 cited in the international search report, the inventions of claims 1-7 lack an inventive step.

Document 1 describes a process for producing a catalyst for waste gas purification in which an uncrystallized composition of a perovskite composite oxide compound containing a noble metal is heat treated together with alumina.

Document 1 does not describe the use of  $\theta$  alumina and  $\alpha$  alumina as the alumina, but as described in documents 2 and 3, it was previously known that the high-temperature durability of catalysts for waste gas purification is increased by using  $\theta$  alumina and  $\alpha$  alumina as the alumina. Therefore, this examination finds that persons skilled in the art can easily conceive of preparing the inventions set forth in claims 1-5 that use these kinds of alumina in the inventions described in document 1.

In addition document 1 does not describe the use of an organometallic salt of a noble metal and an alkoxide other than one of a noble metal when preparing the uncrystallized composition, but as described in document 4 (claim 2; Par. No. 0016; Example 39), it was previously known that a uniform mixed solution of an uncrystallized composition can be obtained by using an organometallic salt of a noble metal and an alkoxide other than one of a noble metal as starting materials for a catalyst for waste gas purification. Therefore, this examination finds that persons skilled in the art can easily conceive of creating the inventions set forth in claims 6 and 7 by using those kinds of constituents in the invention described in document 1. In addition, the use of  $\theta$  alumina and  $\alpha$  alumina as the alumina has already been discussed in the examination of claims 1-5.

**Supplemental Box**

(To be used when the space in any of the preceding boxes is not sufficient)

Continuation of Box I.5.:

At the time it was filed this international application disclosed only a catalyst for waste gas purification, and it did not make a general disclosure of catalyst compositions that are not restricted to waste gas purification. Therefore, the invention of claim 8 on page 71 and the amendment to page 4 are beyond the scope of disclosure of this international application at the time of filing.
